

ALBERT SEIN

Charlottesville, VA | (202) 868-1330 | kks7ys@virginia.edu | linkedin.com/in/albert-sein03

EDUCATION

University of Virginia, Charlottesville, VA

Aug 2023 – May 2028

- *BS Materials Science & Engineering* (May 2027) + *MEng Systems Engineering* (May 2028); accelerated BS/ME program.
- *Relevant Coursework*: Kinetics of Materials; Thermodynamics of Materials; Structure & Defects; Electrical, Magnetic & Optical Properties; Corrosion, Batteries & Fuel Cells (MSE 3080); PDEs.

TECHNICAL SKILLS

- *Materials & Characterization*: SEM, EDS, XRD, Light Microscopy, Hardness & Tensile Testing, Selective Laser Melting (Additive Manufacturing), Carbon-Fiber / Composite Layup
- *Part Design & Simulation*: Fusion 360, SolidWorks, CFD Simulation, REVIT, AutoCAD, 3D Printing
- *Data, Automation & Controls*: ANOVA, Statistical Analysis, Design of Experiments (DoE), MiniTab, Predictive Process Modeling, Excel (advanced), Arduino, Gyroscope & Servo Sensor Integration

WORK EXPERIENCE

Celestica Inc., *Technical Project Manager & Engineering Intern*, San Jose, CA

May 2026 – Present

- Led a team of 4 interns in developing LLM agents using Claude, GPT, and Gemini to automate market intelligence, Excel reporting, data entry and backend logistics workflows for stakeholders across 12 Celestica sites worldwide.
- Performed thermal conductivity testing of thermal interface materials using TIMA5, supporting evaluation of TIM performance for high-power computing and data center cooling applications.
- Analyzed thermal performance data for liquid metal thermal interface materials, including conductivity results, heat maps, warpage, and thermal impedance trends to support optimization of high-performance cooling solutions.
- Applied Minitab for ANOVA and statistical analysis to identify key process and design variables affecting TIM performance, hotspot formation and test repeatability.

UVA MSE, Ji Ma Lab, *AM Research Assistant*, Charlottesville, VA

Jan 2025 – Jan 2026

- Designed and executed multi-factor Design of Experiments (DoE) studies quantifying melt-pool stability, volatile release, and phase evolution across 5 laser-melted builds of lunar-regolith simulant (a ceramic/oxide system).
- Characterized process–structure–property relationships via SEM, EDS, and light microscopy, quantifying porosity, phase evolution, and oxide-to-metal reduction.
- Built parameter-to-phase maps and modeled cooling rates, thermal gradients, and energy density to isolate root causes of volatile release and predict volatility loss across laser parameters.

Setty & Associates, *Mechanical Engineering Intern*, Charlottesville, VA

May 2024 – Aug 2024

- Executed CFD models and mechanical designs for commercial and educational HVAC systems, completing ventilation, psychrometric, and load calculations across 12+ ongoing projects.
- Built BIM proficiency in REVIT and AutoCAD by auditing 5 project files, implementing design revisions, and resolving client RFIs on BIM and shop drawings.

PROJECTS & LEADERSHIP EXPERIENCE

Ordo, *Solo Founder & Product Lead (Independent Project)*, useordoapp.com

Jan 2026 – Present

- Founded Ordo, an AI-powered iOS productivity app focused on non-gamified scheduling, reflection and daily workflows to help users maximize productivity quietly
- Manage the full delivery stack as a solo founder (product strategy, UX, hardware industrial prototyping, manufacturing, web presence, marketing, social media).
